Custom Tabs

Help for this Page

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Action	Label	Tab Style	Description
<a href="#">Edit</a>   <a href="#">Del</a>	Appointments	Airplane	
<a href="#">Edit</a>   <a href="#">Del</a>	Billing details and feedback	Bank	
<a href="#">Edit</a>   <a href="#">Del</a>	Customer Details	Books	
<a href="#">Edit</a>   <a href="#">Del</a>	Service records	Building

☐ Geolocation

mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

☐ Number

Allows users to enter any number. Leading zeros are removed.

☐ Percent

Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.

☒ Phone

Allows users to enter any phone number. Automatically formats it as a phone number.

☐ Picklist

Allows users to select a value from a list you define.

☐ Picklist (Multi-Select)

Allows users to select multiple values from a list you define.

☐ Text

Allows users to enter any combination of letters and numbers.

☐ Text Area

Allows users to enter up to 255 characters on separate lines.

☐ Text Area (Long)

Allows users to enter up to 131,072 characters on separate lines.

☐ Text Area (Rich)

Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.

☐ Text (Encrypted)

Allows users to enter any combination of letters and numbers and store them in encrypted form.

☐ Time

Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50.600" are all valid times for this field.

☐ URL

Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

None

**\*Optimize the Flow for:**

**Fast Field Updates**

Update fields on the record that triggers the flow to run. This high-performance flow runs *before* the record is saved to the database.

**Actions and Related Records**

Update any record and perform actions, like send an email. This more flexible flow runs *after* the record is saved to the database.

☐ Include a Run Asynchronously path to access an external system after the original transaction for the triggering record is successfully committed
